Innovative Safety Products in Air Distribution

Respiratory Protection, Airline Filtration, Breathing Air Systems and Accessories, Air Quality Monitors and Alarms plus Confined Space Ventilation

We are an ISO 9001 manufacturer of safety equipment for Industrial, Construction, Government, Military Defense, Fire / Rescue, Hazmat & Emergency Response applications. We are totally committed to our customer's needs and special job applications. We have always taken great pride in being responsive to the environmental concerns of our equipment users.

High Performance Portable Grade-D Breathing Air Filtration System

The Breather Box® is a portable Grade-D filtration system designed to provide breathing air for a specific number of workers. The system filters incoming air from a compressor to provide respirator users with Grade-D quality air and monitors for CO and/or Oxygen.

The Auto-Air™ Cart provides a systems approach to breathing air filtration. One cart contains our Grade-D filtration unit, and either a pneumatic or electric reserve air system and twin air cylinder storage. Choose a cart size based on the desired amount of reserve air needed to allow workers to safely egress the work area. Carts can operate with either 2400 or 5000psi cylinders.

Heavy duty, industrial grade, ergonomically designed centrifugal blowers and axial fans.

The in-line axial fan has been designed to be used as a stand-alone fan or it can be attached in series to run long lengths of ventilation duct. Intake and exhaust flanges allow for either 8" or 10" duct to be attached to either end or the blower to achieve positive or negative ventilation. The blower is made of light weight steel and is available in standard electric or explosion-proof electric.

Ventilation Systems

- For Confined and Opened Spaces
- For Hazardous and Non-Hazardous
- Explosion Proof and Non-Explosion Proof

Portable Lighting Systems

- Battery Powered
- AC Powered
- Explosion Proof and Non-Explosion Proof

Air-Light® DC powered Portable Area Lighting Systems are designed to provide high power LED lighting for both indoor and the most adverse outdoor conditions. The compact portable design comes fully assembled for use and deploys rapidly in under 30 seconds without the need for component assembly. A stable platform ensures reliable lighting on rugged terrain and high wind conditions. **All lights can be used in dusty & wet environments!**

Air Systems' HEPA filtered portable fume extractor, can provides flow from 230cfm 1000cfm. The small version ideal for many small welding and soldering applications. Large cabinet style fume extractors are available for larger shops and/or large jobs. They feature pleated pre-filters and a final HEPA filter (99.97% at 0.3 micron).

Portable Fume Extractor
