Dust Collection Systems & Vacuums for Power Tools

ATEX certified power tools for use in potentially explosive atmospheres

CS Unitec offers a variety of ATEX certified power tools for use in potentially explosive atmospheres. We offer a comprehensive line of ATEX classified pneumatic and hydraulic power tools including selected models of saws, hacksaws, rotary hammer drills, impact wrenches, portable bands saws, nut runners, magnetic drills and more.

The wide range of ATEX equipment we offer complies with all the guidelines outlined by the ATEX directive, assuring users that the product was manufactured to high levels of safety for use in Ex zones and hazardous environments. Our high quality safety power tools are ideal for anything from construction to underground mining, while following all of the ATEX certifications.

Control Silica Exposure in Construction with HEPA Filtration Dust Collection Systems

Dust Collection Systems & Vacuums for Power Tools

CS Unitec's line of dust collection systems with HEPA filtration provide dust-free working when paired with our power tools. Collect dust, concrete dust, drywall dust, coatings and more. Using our dust collection vacuums with our power tools offers additional protection to operators. A dust collection system will help protect workers from hazardous dust created when drilling, sawing and grinding concrete, masonry and metal. Silica dust, paints, coatings and more can be hazardous to operators and users of this equipment should follow all OSHA and safety regulations.

Heavy Duty Electric, Pneumatic & Hydraulic Saws

Fast, accurate cutting on the job site!

Our saws can be used as hand-held tools or with an assortment of clamps for pipe and other materials. Our complete saw line includes pneumatic, electric and hydraulic-powered tools, saw blades and accessories.

- Heavy-duty saws & saw blades for cutting of steel, stainless steel, Inconel, chrome, Hastelloy, aluminum, iron, ductile iron, plastic, masonry and more
- The best power-to-weight ratios on the market
- Ideal for heavy industry and underwater/subsea applications

Industrial Electric, Air and Hydraulic Drills

CS Unitec offers a complete line of drills and accessories for fast, accurate drilling in steel, aluminum, concrete, plastic, wood and more.

Metal Surface Finishing Tools

CS Unitec offers professional power tools and abrasive accessories, including metal polish machines, for surface finishing on steel, stainless steel, aluminum and other metals, as well as rigid plastics and wood. ***The value is in the engineering... the payback is in the performance.***TM

Non-Sparking / Non-Magnetic Safety Tools

CS Unitec's Non-sparking tools and Non-magnetic hand tools are manufactured from special Aluminum-Bronze (AlBr) or Copper-Beryllium (CuBe) alloys for safe use in Ex zones and where hazardous, flammable or combustible vapors, liquids, dusts or residues may be present. This equipment covers a variety of non-sparking and non-magnetic tool needs, including non-sparking striking tools, non-magnetic tightening tools, and non-sparking cutting tools. You can search for a specific non-magnetic or non-sparking safety tool by its function in the application index or by alphabetic order in the alphabetical non-sparking tool index.
